

SEE THE DIFFERENCE

Kugler LS624 nutrients in the furrow get each plant off to a fast start with a high phosphorus starter plus the added benefits of nitrogen and potassium. Its special low salt formulation makes it the ideal choice to use in-furrow with the seed. LS624 is a positive step toward improving yields and profitability.

FERTILIZERS

Kugler Company

We make them. We sell them.
And nobody does it better.

Kugler is a family owned, Midwest based fertilizer company that has been helping agricultural producers succeed for decades. The foundation of that success is based in Kugler's company-wide commitment to the highest quality—from manufacturing to delivery to application, to the training and education we provide your local Kugler KQ dealer, to the innovative, leading-edge technology we bring to the fertilizer industry.

Discover more about how Kugler quality can put your farming operation in step with the rest of your modern farming practices.

THE ORIGINAL
KUGLER

LS624

LOW SALT STARTER

KUGLER LS624

IN-FURROW OR FOLIAR APPLIED NUTRIENT SYSTEM

THE IDEAL IN-FURROW GERMINATION STIMULANT

Kugler LS624 is formulated to provide an efficient source of N-P-K. Early in the growing season, cool soil temperatures often limit the ability of plant roots to absorb sufficient nutrients and water. An application of a small amount of LS624 at the time of planting may overcome this problem, leading to better plant growth and higher yields.

KEY BENEFITS OF LS624

- Less Corrosive
- Will not settle out when mixed properly
- Highly Soluble
- Low Salt Index
- Nutrient Uniformity in Each Drop
- Great Mixing Flexibility

FOLIAR APPLY AND DELIVERY KEY NUTRIENTS

Kugler LS624 may be applied as a foliar spray application to most field crops to enhance growth and quality and to correct nutrient deficiencies in conjunction with a foliar nitrogen. Foliar fertilization is intended as a supplement to a regular fertilization program and will not, by itself, provide all the nutrients normally required by most crops.

LS624 can be applied in-furrow with the seed on certain crops at the recommended rates.

KUGLER LS624 FLEXIBILITY

Kugler LS624 is well suited to the custom formulation of fertilizer blends and is compatible with many phosphorus, potassium, and micronutrient sources as well as many crop protection chemicals. Kugler recommends testing for compatibility in all spray combinations by a simple jar test with appropriate concentrations.
