K-CARB ProStart™

Planting season just got easier with **K-CARB ProStart™**, the revolutionary high ortho, low-salt starter that combines everything your crops need for a powerful beginning. This in-furrow application delivers a solid micro nutrient package, while managing carbon with the inclusion of Fulvic—creating the perfect balance of nutrients for your soil and plants. In addition, it can be used as a foliar application that combines a robust NPK nutrient package with micros and fulvic.

Key Benefits of K-CARB ProStart™:

- **Nutrient Package:** Packed with essential micro nutrients to give your crops the boost they need right from the start.
- **Carbon Management:** Includes Fulvic, supporting better nutrient uptake and soil health.
- **High Ortho, Low-Salt Formula:** Gentle on your soil, while still providing maximum nutrients.
- **One-Pass Application:** Apply everything in a single pass at planting for an efficient, hassle-free process.

K-CARB ProStart™ isn't just a starter—it's the ultimate all-in-one solution for high-yield, healthy crops. Simplify your planting season and give your crops the best start possible.

Get **K-CARB PROSTART™** today and watch your fields thrive from the ground up.

Think Local. Think Kugler.
